## **Consumer Lending in France and America: Credit and Welfare** Gunnar Trumbull

Why did America embrace consumer credit over the course of the twentieth century, when most other countries did not? How did American policy makers by the late twentieth century come to believe that more credit would make even poor families better off? This book traces the historical emergence of modern consumer lending in America and France. If Americans were profligate in their borrowing, the French were correspondingly frugal. Comparison of the two countries reveals that America's love affair with credit was not primarily the consequence of its culture of consumption, as many writers have observed, nor directly a consequence of its less generous welfare state. It emerged instead from evolving coalitions between fledgling consumer lenders seeking to make their business socially acceptable and a range of non-governmental groups working to promote public welfare, labor, and minority rights. In France, where a similar coalition did not emerge, consumer credit continued to be perceived as economically regressive and socially risky.
