The expert life care planners, psychologists, vocational rehabilitation specialists, and economists who have contributed to this book have collectively testified in over 1,000 trials and have evaluated damages in over 4,000 personal injury cases. Rather than being a "how-to" introduction to personal injury litigation or an explanation of experts' methodology, this book provides the attorney and staff with practical knowledge on how to maximize the effective use of a team of damages experts. This book instructs the attorney in the selection of experts, how that information is used, and the interpretation of experts' reports. Included are checklists for case preparation, legal guidelines for expert testimony, glossaries of scientific terms used by experts, sample casework, and reports.
