Laws and Models: Science, Engineering, and Technology Carl W. Hall

The "laws" that govern our physical universe come in many guises-as principles, theorems, canons, equations, axioms, models, and so forth. They may be empirical, statistical, or theoretical, their names may reflect the person who first expressed them, the person who publicized them, or they might simply describe a phenomenon. However they may be named, the discovery and application of physical laws have formed the backbone of the sciences for 3,000 years.

They exist by thousands. Laws and Models: Science, Engineering, and Technology-the fruit of almost 40 years of collection and research-compiles more than 1,200 of the laws and models most frequently encountered and used by engineers and technologists. The result is a collection as fascinating as it is useful. Each entry consists of a statement of the law or model, its date of origin, a one-line biography of the people involved in its formulation, sources of information about the law, and cross-references.

Illustrated and highly readable, this book offers a unique presentation of the vast and rich collection of laws that rule our universe. Everyone with an interest in the inner workings of nature-from engineers to students, from teachers to journalists-will find Laws and Models to be not only a handy reference, but an engaging volume to read and browse.

From reader reviews:

Sharon Hollars:

People live in this new day time of lifestyle always attempt to and must have the extra time or they will get large amount of stress from both everyday life and work. So , when we ask do people have free time, we will say absolutely yes. People is human not really a huge robot. Then we inquire again, what kind of activity do you have when the spare time coming to you actually of course your answer may unlimited right. Then do you try this one, reading ebooks. It can be your alternative within spending your spare time, typically the book you have read will be Laws and Models: Science, Engineering, and Technology.

Eva Dawson:

Do you have something that that suits you such as book? The publication lovers usually prefer to decide on book like comic, quick story and the biggest one is novel. Now, why not hoping Laws and Models: Science, Engineering, and Technology that give your enjoyment preference will be satisfied by reading this book. Reading behavior all over the world can be said as the means for people to know world considerably better then how they react to the world. It can't be stated constantly that reading practice only for the geeky particular person but for all of you who wants to be success person. So , for all you who want to start studying as your good habit, you can pick Laws and Models: Science, Engineering, and Technology become your current starter.

Timothy McCormack:

You are able to spend your free time you just read this book this book. This Laws and Models: Science, Engineering, and Technology is simple to create you can read it in the area, in the beach, train in addition to soon. If you did not have much space to bring the printed book, you can buy the particular e-book. It is make you much easier to read it. You can save typically the book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.

Numbers Harless:

As a student exactly feel bored to be able to reading. If their teacher questioned them to go to the library or make summary for some publication, they are complained. Just very little students that has reading's heart and soul or real their pastime. They just do what the instructor want, like asked to go to the library. They go to at this time there but nothing reading very seriously. Any students feel that examining is not important, boring as well as can't see colorful photographs on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this era, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this Laws and Models: Science, Engineering, and Technology can make you truly feel more interested to read.
