The Plasma Universe

Curt Suplee

The Plasma Universe Curt Suplee

Plasma physics is the fascinating science behind lightning bolts, fluorescent lights, solar flares, ultra-bright TV screens, fusion reactors, cosmic jets and black hole radiation, to name but a few examples. Research into this could lead to a source of unlimited, non-polluting energy. Yet plasmas obey their own, often very surprising, rules, and repeatedly defy our best efforts to anticipate and control them. This richly illustrated, full color book reveals for the first time the exciting world of plasma physics to a non-technical audience. It describes the phenomena, and follows the worldwide research effort to comprehend them, taking the reader on a journey from neighborhood neon lights to the remotest galaxies and beyond. The lively writing is interspersed with fascinating photographs and explanatory diagrams, giving the readers a deeper understanding of the world around them.
