What is unique about the process in the discussion of healthcare and interventions to use when working with families? What assessment tools provide guidance for healthcare providers as they determine interventions for families in their care? What are the changing dimensions of contemporary family life, and what impact do those dimensions have on health promotion for families? How is family healthcare changing in terms of practices, delivery systems, costs and insurance coverage?

Students are able to explore these questions and more in the **Encyclopedia of Family Health**.

Approximately 350 signed articles written by experts from such varied fields as health and nursing, social and behavioral sciences, and policy provide authoritative, cross-disciplinary coverage. Entries examine theory, research and policy as they relate to family practice in a manner that is accessible and jargon-free. From 'Adolescent Suicide' and 'Alternative Therapies' to 'Visitation during Hospitalization' and 'Weight Problems and Genetics', this work provides coverage of a variety of issues within a family context. The **Encyclopedia of Family Health** provides a comprehensive summary of theory, research, practice, and policy on family health and wellness promotion for students and researchers.
