## **Forest Monitoring: Chapter 20. Quality Assurance in International Forest Monitoring in Europe (Developments in Environmental Science) Marco Ferretti, Nils König**

A comprehensive Quality Assurance (QA) approach has been recently developed and implemented within the largest international forest monitoring program in Europe: ICP Forests. It includes a series of components aimed at providing agreed methods, explicit quality standards, training, and intercomparison procedures as well as remedial counter-actions. All investigations carried out by the program are covered, and this provides the basis for documented statements about data quality. Although considerable work is still necessary in the area of field sampling, the QA approach presented here can also be useful for other programs and projects based on international, multiagency cooperation.
