Building Automation: Communication systems with EIB/KNX, LON and BACnet (Signals and Communication Technology) Hermann Merz, Thomas Hansemann, Christof Hübner

Modern buildings are increasingly equipped with actuators and sensors, communication, visualization and control systems. This textbook provides an overview of industrial communication systems and stimulates a basic understanding of network and bus systems for the automation of buildings.

After an introduction to EIB/KNX, LON und BACnet technologies, the authors illustrate how these systems can be utilized for specific applications, like air conditioning or illumination. This book assumes only a basic knowledge of mathematics and thanks to its simple explanations and many examples is ideal for students and professional engineers who require practical solutions.

From reader reviews:

Roger Bennett:

Nowadays reading books become more than want or need but also be a life style. This reading routine give you lot of advantages. The advantages you got of course the knowledge the particular information inside the book that improve your knowledge and information. The knowledge you get based on what kind of book you read, if you want get more knowledge just go with knowledge books but if you want experience happy read one together with theme for entertaining for instance comic or novel. Often the Building Automation: Communication systems with EIB/KNX, LON and BACnet (Signals and Communication Technology) is kind of reserve which is giving the reader capricious experience.

David McMillian:

The reason why? Because this Building Automation: Communication systems with EIB/KNX, LON and BACnet (Signals and Communication Technology) is an unordinary book that the inside of the book waiting for you to snap the item but latter it will distress you with the secret the item inside. Reading this book close to it was fantastic author who else write the book in such wonderful way makes the content within easier to understand, entertaining way but still convey the meaning completely. So , it is good for you for not hesitating having this ever again or you going to regret it. This excellent book will give you a lot of positive aspects than the other book have such as help improving your skill and your critical thinking approach. So , still want to delay having that book? If I had been you I will go to the reserve store hurriedly.

Benjamin Munk:

You may spend your free time to learn this book this e-book. This Building Automation: Communication systems with EIB/KNX, LON and BACnet (Signals and Communication Technology) is simple to develop you can read it in the area, in the beach, train along with soon. If you did not have got much space to bring the printed book, you can buy the particular e-book. It is make you easier to read it. You can save often the book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.

Kimberly Casselman:

As a university student exactly feel bored to help reading. If their teacher requested them to go to the library in order to make summary for some e-book, they are complained. Just very little students that has reading's heart or real their hobby. They just do what the instructor want, like asked to go to the library. They go to at this time there but nothing reading really. Any students feel that reading is not important, boring along with can't see colorful images on there. Yeah, it is being complicated. Book is very important for you. As we know that on this period of time, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. So , this Building Automation: Communication systems with EIB/KNX, LON and BACnet (Signals and Communication Technology) can make you sense more interested to read.
