## **Pesticide Risk Assessment for Pollinators** David Fischer, Tom Moriarty

Pollinators play a vital role in ecosystem health and are essential to ensuring food security. With declines in both managed and wild pollinator populations in recent years, scientists and regulators have sought answers to this problem and have explored implementing steps to protect pollinator populations now and for the future. *Pesticide Risk Assessment for Pollinators* focuses on the role pesticides play in impacting bee populations and looks to develop a risk assessment process, along with the data to inform that process, to better assess the potential risks that can accompany the use of pesticide products.

*Pesticide Risk Assessment for Pollinators* opens with two chapters that provide a biological background of both *Apis* and non-*Apis* species of pollinators. Chapters then present an overview of the general regulatory risk assessment process and decision-making processes. The book then discusses the core elements of a risk assessment, including exposure estimation, laboratory testing, and field testing. The book concludes with chapters on statistical and modeling tools, and proposed additional research that may be useful in developing the ability to assess the impacts of pesticide use on pollinator populations.

Summarizing the current state of the science surrounding risk assessment for *Apis* and non-*Apis* species, *Pesticide Risk Assessment for Pollinators* is a timely work that will be of great use to the environmental science and agricultural research communities.

- Assesses pesticide risk to native and managed pollinators
- Summarizes the state of the science in toxicity testing and risk assessment
- Provides valuable biological overviews of both *Apis* and non-*Apis* pollinators
- Develops a plausible overall risk assessment framework for regulatory decision making
- Looks towards a globally harmonized approach for pollinator toxicity and risk assessment

### **From reader reviews:**

#### **Rita Hackett:**

As people who live in often the modest era should be change about what going on or info even knowledge to make them keep up with the era that is certainly always change and make progress. Some of you maybe will update themselves by reading through books. It is a good choice in your case but the problems coming to an individual is you don't know which one you should start with. This Pesticide Risk Assessment for Pollinators is our recommendation to cause you to keep up with the world. Why, because book serves what you want and want in this era.

#### **Mora Miller:**

Can you one of the book lovers? If yes, do you ever feeling doubt if you find yourself in the book store? Aim to pick one book that you never know the inside because don't evaluate book by its include may doesn't work the following is difficult job because you are frightened that the inside maybe not seeing that fantastic as in the outside look likes. Maybe you answer can be Pesticide Risk Assessment for Pollinators why because the fantastic cover that make you consider with regards to the content will not disappoint an individual. The inside or content will be fantastic as the outside or maybe cover. Your reading 6th sense will directly assist you to pick up this book.

#### **Catherine Lyons:**

You could spend your free time to see this book this book. This Pesticide Risk Assessment for Pollinators is simple to create you can read it in the park, in the beach, train as well as soon. If you did not possess much space to bring the particular printed book, you can buy the actual e-book. It is make you quicker to read it. You can save typically the book in your smart phone. So there are a lot of benefits that you will get when one buys this book.

#### **Nancy Williams:**

A lot of guide has printed but it differs. You can get it by net on social media. You can choose the most effective book for you, science, witty, novel, or whatever simply by searching from it. It is called of book Pesticide Risk Assessment for Pollinators. You can include your knowledge by it. Without departing the printed book, it could possibly add your knowledge and make anyone happier to read. It is most significant that, you must aware about e-book. It can bring you from one place to other place.
