John A. Wise, V.David Hopkin, Paul Stager

Verification and Validation of Complex Systems: Human Factors Issues (Nato ASI Subseries F:) John A. Wise, V.David Hopkin, Paul Stager

Despite its increasing importance, the verification and validation of the human-machine interface is perhaps the most overlooked aspect of system development. Although much has been written about the design and development process, very little organized information is available on how to verify and validate highly complex and highly coupled dynamic systems. Inability to evaluate such systems adequately may become the limiting factor in our ability to employ systems that our technology and knowledge allow us to design.

This volume, based on a NATO Advanced Science Institute held in 1992, is designed to provide guidance for the verification and validation of all highly complex and coupled systems. Air traffic control is used as an example to ensure that the theory is described in terms that will allow its implementation, but the results can be applied to all complex and coupled systems.

The volume presents the knowledge and theory in a format that will allow readers from a wide variety of backgrounds to apply it to the systems for which they are responsible.

The emphasis is on domains where significant advances have been made in the methods of identifying potential problems and in new testing methods and tools. Also emphasized are techniques to identify the assumptions on which a system is built and to spot their weaknesses.

From reader reviews:

Christian Fowler:

Hey guys, do you really wants to finds a new book to study? May be the book with the subject Verification and Validation of Complex Systems: Human Factors Issues (Nato ASI Subseries F:) suitable to you? The book was written by popular writer in this era. Typically the book untitled Verification and Validation of Complex Systems: Human Factors Issues (Nato ASI Subseries F:) is the main one of several books which everyone read now. This book was inspired lots of people in the world. When you read this publication you will enter the new dimension that you ever know ahead of. The author explained their idea in the simple way, thus all of people can easily to understand the core of this publication. This book will give you a lot of information about this world now. To help you to see the represented of the world within this book.

Matthew Brown:

The e-book with title Verification and Validation of Complex Systems: Human Factors Issues (Nato ASI Subseries F:) contains a lot of information that you can understand it. You can get a lot of profit after read this book. This book exist new knowledge the information that exist in this e-book represented the condition of the world at this point. That is important to yo7u to know how the improvement of the world. That book will bring you inside new era of the the positive effect. You can read the e-book with your smart phone, so you can read that anywhere you want.

Christopher Morton:

Many people spending their period by playing outside using friends, fun activity with family or just watching TV 24 hours a day. You can have new activity to enjoy your whole day by reading a book. Ugh, you think reading a book can actually hard because you have to accept the book everywhere? It alright you can have the e-book, getting everywhere you want in your Touch screen phone. Like Verification and Validation of Complex Systems: Human Factors Issues (Nato ASI Subseries F:) which is getting the e-book version. So , try out this book? Let's notice.

Lisa Walker:

Guide is one of source of information. We can add our understanding from it. Not only for students but in addition native or citizen require book to know the upgrade information of year to help year. As we know those guides have many advantages. Beside we add our knowledge, could also bring us to around the world. From the book Verification and Validation of Complex Systems: Human Factors Issues (Nato ASI Subseries F:) we can take more advantage. Don't you to definitely be creative people? For being creative person must choose to read a book. Just choose the best book that suited with your aim. Don't be doubt to change your life by this book Verification and Validation of Complex Systems: Human Factors Issues (Nato ASI Subseries F:). You can more pleasing than now.
