## Plant Biotechnology 2002 and Beyond

The 10th IAPTC&B Congress, Plant Biotechnology 2002 and Beyond, was held June 23-28, 2002, at Disney's Coronado Springs Resort, in Orlando, Florida, USA. It was attended by 1,176 scientists from 54 countries. The best and brightest stars of international plant biotechnology headlined the scientific program. It included the opening address by the President of the IAPTC&B, 14 plenary lectures, and 111 keynote lectures and contributed papers presented in 17 symposia covering all aspects of plant biotechnology. More than 500 posters supplemented the formal program. The distinguished speakers described, discussed and debated not only the best of science that has been done or is being done, but also how the power of plant biotechnology can be harnessed to meet future challenges and needs. The program was focused on what is new and what is exciting, what is state of the art, and what is on the cutting edge of science and technology. In keeping with the international mandate of the IAPTC&B, 73 of the 125 speakers were from outside the United States, representing 27 countries from every region of the world. The 10th IAPTC&B Congress was a truly world-class event.

The IAPTC&B, founded in 1963 at the first international conference of plant tissue culture organized by Philip White in the United States, currently has over 1,500 members in 85 countries. It is the largest, oldest, and the most comprehensive international professional organization in the field of plant biotechnology. The IAPTC&B has served the plant biotechnology community well through its many active national chapters throughout the World, by maintaining and disseminating a membership list and a website, by the publication of an official journal (formerly the Newsletter), and by organizing quadrennial international congresses in France (1970), the United Kingdom (1974), Canada (1978), Japan (1982), the United States (1963, 1986, 2002), The Netherlands (1990), Italy (1994), and Israel (1998). In addition, the IAPTC&B has a long tradition of publishing the proceedings of its congresses. Individually, these volumes have provided authoritative quadrennial reports of the status of international plant biotechnology. Collectively, they document the history of plant biotechnology during the 20th century. They are indeed a valuable resource.

We are pleased to continue this tradition by publishing this proceedings volume of the 10th IAPTC&B Congress. Regrettably, we are not able to publish seven of the lectures in full (only their abstracts are included).

The American and Canadian chapters of the IAPTC&B, the Plant Section of the Society for In Vitro Biology, and the University of Florida hosted the 10th IAPTC&B Congress. The Congress was a true partnership between academia and industry, and was generously supported by both groups (see list of donors/sponsors on back cover). A number of prominent international biotechnology companies and publishers participated in the very successful Science and Technology Exhibit (see accompanying list of exhibitors) The IAPTC&B awarded 84 fellowships to young scientists from 31 countries (see accompanying list of fellowship recipients) to support their participation in the Congress.

### **From reader reviews:**

#### **Vicky Bowman:**

The reserve untitled Plant Biotechnology 2002 and Beyond is the publication that recommended to you to read. You can see the quality of the publication content that will be shown to an individual. The language that author use to explained their way of doing something is easily to understand. The article writer was did a lot of exploration when write the book, so the information that they share for you is absolutely accurate. You also can get the e-book of Plant Biotechnology 2002 and Beyond from the publisher to make you far more enjoy free time.

#### **Gina Dana:**

In this period globalization it is important to someone to obtain information. The information will make you to definitely understand the condition of the world. The health of the world makes the information much easier to share. You can find a lot of recommendations to get information example: internet, newspaper, book, and soon. You can view that now, a lot of publisher that print many kinds of book. The book that recommended to you is Plant Biotechnology 2002 and Beyond this book consist a lot of the information in the condition of this world now. This kind of book was represented how do the world has grown up. The vocabulary styles that writer make usage of to explain it is easy to understand. The actual writer made some research when he makes this book. Here is why this book appropriate all of you.

#### **Brooke Callender:**

This Plant Biotechnology 2002 and Beyond is new way for you who has interest to look for some information mainly because it relief your hunger associated with. Getting deeper you on it getting knowledge more you know or you who still having bit of digest in reading this Plant Biotechnology 2002 and Beyond can be the light food for you because the information inside this kind of book is easy to get by simply anyone. These books produce itself in the form which can be reachable by anyone, yes I mean in the e-book form. People who think that in reserve form make them feel drowsy even dizzy this publication is the answer. So there is not any in reading a publication especially this one. You can find actually looking for. It should be here for anyone. So , don't miss the item! Just read this e-book sort for your better life as well as knowledge.

#### **Susan Douglas:**

As we know that book is important thing to add our knowledge for everything. By a e-book we can know everything we want. A book is a set of written, printed, illustrated as well as blank sheet. Every year ended up being exactly added. This reserve Plant Biotechnology 2002 and Beyond was filled in relation to science. Spend your extra time to add your knowledge about your science competence. Some people has distinct feel when they reading a new book. If you know how big benefit from a book, you can really feel enjoy to read a guide. In the modern era like currently, many ways to get book that you just wanted.
