Three-Dimensional Flows (Ergebnisse der Mathematik und ihrer Grenzgebiete. 3. Folge / A Series of Modern Surveys in Mathematics)

Vítor Araújo, Maria José Pacifico

Three-Dimensional Flows (Ergebnisse der Mathematik und ihrer Grenzgebiete. 3. Folge / A Series of Modern Surveys in Mathematics) Vítor Araújo, Maria José Pacifico

In this book, the authors present the elements of a general theory for flows on three-dimensional compact boundaryless manifolds, encompassing flows with equilibria accumulated by regular orbits.

The book aims to provide a global perspective of this theory and make it easier for the reader to digest the growing literature on this subject. This is not the first book on the subject of dynamical systems, but there are distinct aspects which together make this book unique.

Firstly, this book treats mostly continuous time dynamical systems, instead of its discrete counterpart, exhaustively treated in some other texts. Secondly, this book treats all the subjects from a mathematical perspective with proofs of most of the results included. Thirdly, this book is meant to be an advanced graduate textbook and not just a reference book or monograph on the subject. This aspect is reflected in the way the cover material is presented, with careful and complete proofs, and precise references to topics in the book.

From reader reviews:

Nathan Wilson:

This book untitled Three-Dimensional Flows (Ergebnisse der Mathematik und ihrer Grenzgebiete. 3. Folge / A Series of Modern Surveys in Mathematics) to be one of several books in which best seller in this year, this is because when you read this guide you can get a lot of benefit onto it. You will easily to buy this specific book in the book retail store or you can order it by using online. The publisher of this book sells the e-book too. It makes you quickly to read this book, since you can read this book in your Mobile phone. So there is no reason to you to past this publication from your list.

John Householder:

Spent a free a chance to be fun activity to perform! A lot of people spent their spare time with their family, or their own friends. Usually they doing activity like watching television, going to beach, or picnic inside park. They actually doing same thing every week. Do you feel it? Do you need to something different to fill your own free time/ holiday? Could possibly be reading a book is usually option to fill your no cost time/ holiday. The first thing you will ask may be what kinds of reserve that you should read. If you want to test look for book, may be the e-book untitled Three-Dimensional Flows (Ergebnisse der Mathematik und ihrer Grenzgebiete. 3. Folge / A Series of Modern Surveys in Mathematics) can be excellent book to read. May be it may be best activity to you.

Reuben Beaubien:

Precisely why? Because this Three-Dimensional Flows (Ergebnisse der Mathematik und ihrer Grenzgebiete. 3. Folge / A Series of Modern Surveys in Mathematics) is an unordinary book that the inside of the publication waiting for you to snap the item but latter it will zap you with the secret this inside. Reading this book beside it was fantastic author who else write the book in such amazing way makes the content inside of easier to understand, entertaining way but still convey the meaning completely. So , it is good for you because of not hesitating having this nowadays or you going to regret it. This unique book will give you a lot of advantages than the other book get such as help improving your talent and your critical thinking method. So , still want to hold up having that book? If I ended up you I will go to the reserve store hurriedly.

Randy Jones:

Are you kind of hectic person, only have 10 or even 15 minute in your time to upgrading your mind proficiency or thinking skill also analytical thinking? Then you are receiving problem with the book when compared with can satisfy your short time to read it because this all time you only find reserve that need more time to be read. Three-Dimensional Flows (Ergebnisse der Mathematik und ihrer Grenzgebiete. 3. Folge / A Series of Modern Surveys in Mathematics) can be your answer because it can be read by you actually who have those short free time problems.
