**Equitable Resource Allocation: Models, Algorithms and Applications (Information and Communication Technology Series,)** Hanan Luss

**A unique book that specifically addresses equitable resource allocation problems with applications in communication networks, manufacturing, emergency services, and more**

Resource allocation problems focus on assigning limited resources in an economically beneficial way among competing activities. Solutions to such problems affect people and everyday activities with significant impact on the private and public sectors and on society at large.

Using diverse application areas as examples, *Equitable Resource Allocation: Models, Algorithms, and Applications* provides readers with great insight into a topic that is not widely known in the field. Starting with an overview of the topics covered, the book presents a large variety of resource allocation models with special mathematical structures and provides elegant, efficient algorithms that compute optimal solutions to these models.

Authored by one of the leading researchers in the field, *Equitable Resource Allocation*:

- Is the only book that provides a comprehensive exposition of equitable resource allocation problems
- Presents a collection of resource allocation models with applications in communication networks, transportation, content distribution, manufacturing, emergency services, and more
- Exhibits practical algorithms for solving a variety of resource allocation models
- Uses real-world applications and examples to explain important concepts
- Includes end-of-chapter exercises

Bringing together much of the equitable resource allocation research from the past thirty years, this book is a valuable reference for anyone interested in solving diverse optimization problems.

**From reader reviews:**

**Gonzalo Barnes:**

Book is to be different for every single grade. Book for children right up until adult are different content. To be sure that book is very important for people. The book Equitable Resource Allocation: Models, Algorithms and Applications (Information and Communication Technology Series,) ended up being making you to know about other information and of course you can take more information. It is quite advantages for you. The e-book Equitable Resource Allocation: Models, Algorithms and Applications (Information and Communication Technology Series,) is not only giving you much more new information but also to get your friend when you feel bored. You can spend your current spend time to read your reserve. Try to make relationship with all the book Equitable Resource Allocation: Models, Algorithms and Applications (Information and Communication Technology Series,). You never really feel lose out for everything if you read some books.

**Robert McKay:**

As people who live in the particular modest era should be up-date about what going on or data even knowledge to make them keep up with the era which can be always change and progress. Some of you maybe will certainly update themselves by examining books. It is a good choice for you personally but the problems coming to you is you don't know which you should start with. This Equitable Resource Allocation: Models, Algorithms and Applications (Information and Communication Technology Series,) is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and wish in this era.

**Gary Forsyth:**

Nowadays reading books become more than want or need but also become a life style. This reading addiction give you lot of advantages. Associate programs you got of course the knowledge your information inside the book this improve your knowledge and information. The info you get based on what kind of e-book you read, if you want drive more knowledge just go with training books but if you want sense happy read one using theme for entertaining for instance comic or novel. The Equitable Resource Allocation: Models, Algorithms and Applications (Information and Communication Technology Series,) is kind of book which is giving the reader unforeseen experience.

**Christopher Gonzalez:**

As we know that book is very important thing to add our information for everything. By a reserve we can know everything you want. A book is a set of written, printed, illustrated or blank sheet. Every year ended up being exactly added. This publication Equitable Resource Allocation: Models, Algorithms and Applications (Information and Communication Technology Series,) was filled about science. Spend your extra time to add your knowledge about your scientific research competence. Some people has different feel when they

reading a book. If you know how big good thing about a book, you can experience enjoy to read a publication. In the modern era like today, many ways to get book that you simply wanted.
