Developing Online Learning Environments in Nursing Education, Third Edition (Springer Series on the Teaching of Nursing) Matthew Rietschel MS

This third edition of the best-selling nurse educator's handbook on using online teaching tools and assessing their results keeps pace with the rapid-fire progression in digital learning that has occurred since the second edition was published in 2008. Completely revised and updated, this edition presents several new interactive digital tools and current guidelines in translating courses from the classroom to the online environment. It provides new content on Web-based learning theories and how to optimally teach students using the latest technology. Additionally, this edition offers new information on staff development and a new chapter on the role of staff development educator, guides instructors on how to build an on-line community, and includes practical, proven measures for student assessment and evaluation in online education.

Using a step-by-step approach, the book discusses the basics of online learning, its infrastructure, and its technical support needs. Current evidenced-based research examines teacher-student interactions, course management, web-based resources, and best-practices. The text also includes an overview of free and for-purchase technologies and describes how to choose those technologies that meet the needs of a particular teaching situation. The book is completely interactive, containing web-based tools to enhance methods and concepts. Chapters also include interactive case studies, tutorials, and exercises to enhance learning and test learning styles. This text will not only provide optimal guidance for using the Web to teach students and professional nurses skills they need to embrace best practices and achieve optimal outcomes, it will also instill in them the habits of lifelong learning.

New to the third edition:

- Includes new web-based interactive features to promote online learning and skills
- Features new chapter on the nurse in staff development
- Provides current guidelines on translating courses from the classroom to the online environment
- Presents new content on Web-based learning theories and teaching with technology
- Includes practical measures for student assessment and evaluation in online education backed by research and consensus

Cassandra Rosas:

As a college student, I exactly feel bored to reading. If their teacher inquired them to go to the library in order to make a summary for some book, they are complained. Just minor students that have reading's spirit or real interest. They just do what the educator wants, like asked to go to the library. They go to at this time there but nothing reading seriously. Any students feel that studying is not important, boring as well as can't see colorful pics on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this period of time, many ways to get whatever you want. Likewise, words say, many ways to reach Chinese's country. Therefore this *Developing Online Learning Environments in Nursing Education, Third*

Edition (Springer Series on the Teaching of Nursing) can make you truly feel more interested to read.
