## Sepsis Management: PIRO and MODS

This book is unique in approaching multiple organ dysfunction syndrome (MODS) from the perspective of its pathophysiological mechanism, and addressing aspects that are overlooked in most of the available literature. Eminent experts in the field from Europe and beyond offer new insights into risk stratification, severity assessment, and management of critically ill patients with sepsis. The principal focus is on recently developed concepts in infection management and in antibiotic use, bearing in mind that in these patients the pharmacokinetics of antibiotics are altered, affecting renal clearance and requiring dosage adjustments. The significance of the PIRO (predisposing factors, infection, response, organ dysfunction) model in the development of effective treatment strategies is emphasized. This book will be of interest and value to all who are involved in the treatment of, or research into, sepsis and MODS.
