A partir del momento en que un sujeto presenta tensiones a nivel de las cadenas, a nivel visceral, neurovascular o muscular, modifica automáticamente su estática y la desarrolla sobre un esquema de compensación que tiene como simple objetivo alcanzar cierta comodidad. Con el método de las cadenas fisiológicas y gracias a la continuidad anatómica del tejido conectivo en las diferentes cadenas y en los diferentes planos, tenemos la posibilidad de ejercer una acción de relajación que se extenderá hacia las zonas de fijación, ya sean periféricas o internas.

El autor presenta, en la primera parte de la obra, un estudio anatómico detallado y progresivo que pone de manifiesto la continuidad entre la cadena visceral y las cadenas musculoesqueléticas. El estudio anatómico del tórax, de la garganta y de la boca se centra en la exposición meticulosa de todas las relaciones de contigüidad y de continuidad presentes en el sistema musculoesquelético y el sistema visceral. Luego, en la segunda parte, muestra, primero, los detalles del examen del paciente para entrar, seguidamente, en los detalles del tratamiento de la cadena visceral a nivel torácica y de la garganta.

Léopold Busquet es director del centro de formación Les chaînes physiologiques.
