Epaminondas Kapetanios, Doina Tatar, Christian Sacarea

Natural Language Processing: Semantic Aspects Epaminondas Kapetanios, Doina Tatar, Christian Sacarea

This book introduces the semantic aspects of natural language processing and its applications. Topics covered include: measuring word meaning similarity, multi-lingual querying, and parametric theory, named entity recognition, semantics, query language, and the nature of language. The book also emphasizes the portions of mathematics needed to understand the discussed algorithms.

From reader reviews:

Bernard McLaren:

Information is provisions for folks to get better life, information these days can get by anyone with everywhere. The information can be a understanding or any news even a problem. What people must be consider any time those information which is from the former life are difficult to be find than now is taking seriously which one is acceptable to believe or which one often the resource are convinced. If you get the unstable resource then you buy it as your main information there will be huge disadvantage for you. All those possibilities will not happen in you if you take Natural Language Processing: Semantic Aspects as the daily resource information.

Wayne Ross:

This Natural Language Processing: Semantic Aspects is great reserve for you because the content which can be full of information for you who else always deal with world and have to make decision every minute. This specific book reveal it facts accurately using great coordinate word or we can say no rambling sentences inside. So if you are read the item hurriedly you can have whole info in it. Doesn't mean it only will give you straight forward sentences but challenging core information with wonderful delivering sentences. Having Natural Language Processing: Semantic Aspects in your hand like getting the world in your arm, facts in it is not ridiculous just one. We can say that no book that offer you world in ten or fifteen tiny right but this e-book already do that. So , this can be good reading book. Hi Mr. and Mrs. occupied do you still doubt that?

Cesar Smith:

Reading a book to become new life style in this 12 months; every people loves to study a book. When you study a book you can get a lot of benefit. When you read books, you can improve your knowledge, since book has a lot of information in it. The information that you will get depend on what types of book that you have read. If you would like get information about your research, you can read education books, but if you want to entertain yourself look for a fiction books, this kind of us novel, comics, along with soon. The Natural Language Processing: Semantic Aspects will give you new experience in reading through a book.

Terry Brown:

Is it you actually who having spare time then spend it whole day by means of watching television programs or just lying on the bed? Do you need something totally new? This Natural Language Processing: Semantic Aspects can be the reply, oh how comes? A fresh book you know. You are and so out of date, spending your spare time by reading in this completely new era is common not a nerd activity. So what these books have than the others?
