Brain Stimulation: Chapter 47. Brain stimulation in migraine (Handbook of Clinical Neurology)

Filippo Brighina, Giuseppe Cosentino, Brigida Fierro

Migraine is a very prevalent disease with great individual disability and socioeconomic burden. Despite intensive research effort in recent years, the etiopathogenesis of the disease remains to be elucidated.

Recently, much importance has been given to mechanisms underlying the cortical excitability that has been suggested to be dysfunctional in migraine. In recent years, noninvasive brain stimulation techniques based on magnetic fields (transcranial magnetic stimulation, TMS) and on direct electrical currents (transcranial direct current stimulation, tDCS) have been shown to be safe and effective tools to explore the issue of cortical excitability, activation, and plasticity in migraine. Moreover, TMS, repetitive TMS (rTMS), and tDCS, thanks to their ability to interfere with and/or modulate cortical activity inducing plastic, persistent effects, have been also explored as potential therapeutic approaches, opening an interesting perspective for noninvasive neurostimulation for both symptomatic and preventive treatment of migraine and other types of headache. In this chapter we critically review evidence regarding the role of noninvasive brain stimulation in the pathophysiology and treatment of migraine, delineating the advantages and limits of these techniques together with potential development and future application.

From reader reviews:

Kevin White:

People live in this new moment of lifestyle always try and and must have the free time or they will get wide range of stress from both daily life and work. So , if we ask do people have free time, we will say absolutely indeed. People is human not really a robot. Then we question again, what kind of activity are there when the spare time coming to you of course your answer can unlimited right. Then do you try this one, reading guides. It can be your alternative throughout spending your spare time, often the book you have read will be Brain Stimulation: Chapter 47. Brain stimulation in migraine (Handbook of Clinical Neurology).

Chad Foster:

Beside this particular Brain Stimulation: Chapter 47. Brain stimulation in migraine (Handbook of Clinical Neurology) in your phone, it may give you a way to get closer to the new knowledge or info. The information and the knowledge you will got here is fresh through the oven so don't be worry if you feel like an outdated people live in narrow small town. It is good thing to have Brain Stimulation: Chapter 47. Brain stimulation in migraine (Handbook of Clinical Neurology) because this book offers to you readable information. Do you oftentimes have book but you rarely get what it's interesting features of. Oh come on, that won't happen if you have this in your hand. The Enjoyable set up here cannot be questionable, just like treasuring beautiful island. Use you still want to miss the item? Find this book and also read it from at this point!

Janice Burgess:

In this era which is the greater man or who has ability to do something more are more precious than other. Do you want to become considered one of it? It is just simple strategy to have that. What you should do is just spending your time almost no but quite enough to possess a look at some books. Among the books in the top list in your reading list is usually Brain Stimulation: Chapter 47. Brain stimulation in migraine (Handbook of Clinical Neurology). This book which can be qualified as The Hungry Mountains can get you closer in turning out to be precious person. By looking up and review this guide you can get many advantages.

James Melendez:

That book can make you to feel relax. That book Brain Stimulation: Chapter 47. Brain stimulation in migraine (Handbook of Clinical Neurology) was bright colored and of course has pictures on there. As we know that book Brain Stimulation: Chapter 47. Brain stimulation in migraine (Handbook of Clinical Neurology) has many kinds or variety. Start from kids until adolescents. For example Naruto or Investigation company Conan you can read and believe that you are the character on there. Therefore , not at all of book usually are make you bored, any it makes you feel happy, fun and relax. Try to choose the best book for yourself and try to like reading that.
